DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, Applicants amendment filed February 2, 2004 presented limitations that had the optical switches and optical switching method in the independent claims each possessing a plurality of input ports, a plurality of auxiliary ports, a plurality of output ports, and a plurality of auxiliary output ports. The prior art of reference fails to teach this limitation connected together in a non-blocking optical switch as specified in the claimed invention where the connection of the auxiliary output ports of the first optical matrix switch is to the input ports of the third optical matrix switch, the connection of the output ports of the second optical matrix switch is to the auxiliary input ports of the third optical matrix switch, the connection of the output ports of the first optical matrix switch is to the auxiliary input ports of the fourth optical matrix switch, and the connection of the auxiliary output ports of the second optical matrix switch is to the input ports of the fourth optical matrix switch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
